

Web print available remotely:

Patrons are now able to access the web print features both on-site and remotely.

Patrons can visit <https://printing.clevnet.org>, log in using the library card credentials, and then choose "**Web Print**" on the left. From there, select the **Hubbard** print queue and upload a document for printing.

Once it has been processed, patrons can release the job on-site the same as if they had printed from a Hubbard workstation.

These jobs may take slightly longer to appear ready for release than a job submitted from a workstation.
